SECTION 1.401

PETITION FOR AMENDMENT OF
THE FM TABLE OF ASSIGNMENTS

FM EXAMINER

AUG 20 7 29 AM '93

RECEIVED

PETITIONER: PETER L. CEA
707 GREEN COOK RD.
SUNBURY, OH 43074

I. INTRODUCTION TO THE PETITIONING PARTY

The intention of this pleading is to construct a valid petition to amend the FM Table of Assignments (47 CFR 73.202). The Code of Federal Regulations 47 has been used as a guideline to construct this document.

Being Peter L. Cea, who will be referred to as the "party", who chooses to participate in the timely filing of this petition for the rulemaking as defined in section 1.400. For the record, the party currently resides and corresponds from 707 Green Cook Road, Sunbury, Ohio 43074-9761.

To establish the reputable character of the party, it should be known that this petition conforms to the specific rulemaking requirements of sections 1.49, 1.52, and 1.42(e). Due to the absence of any current channel assignment changes, section 1.401(d) will not pertain to this petition. It will be the review of this document to decide the validity of all statements held within section 1.401(e).

To satisfy the party's statement of interest to this petition, let it be known that Peter L. Cea seeks channel assignment should the results warrant amending the FM Table of Assignments. Additionally, should the Commission give assignment preference to the petitioning party, it is the intention of the party along with its assigns to continue with interest to seek the assignments construction permit.

II. THE LOCATION AND ASSIGNMENT PETITIONED

Considering the Table of FM Assignments and Minimum distance separation between stations (section 73.207), the channel number concerning this petition is channel 232 or 94.3 Mhz. This frequency would be assigned to the principal community of Pleasant City, Ohio.

Using the distance computations and reference points supplied from the F.C.C. database of FM Assignments, the proper station separations are maintained as regulated by section 73.207. The party submits the proper calculations as evidence in this petition.

III. PRINCIPAL COMMUNITY REQUIREMENTS

The coordinates chosen for the proper distance between stations are located approximately five and one half kilometers southeast of the principal community to be served. Although this would not constitute the actual antenna location, this site possesses the ability to meet the transmission requirements and area of coverage outlined in section 73.315.

IV. ISSUES CONCERNING PART 17

This petition will address any possible obstructions to air traffic safety due to antenna structure location as regulated by the Federal Aviation Administration. The coordinates of the petitioned assignment are approximately no less than 4.5 miles from the nearest municipal airport (Logan County Airport). By

the interpretation of section 17.7, an antenna structure appropriate in height for a Class A station would not jeopardize air traffic. Notification and construction approval by the Federal Aviation Administration would be the responsibility of the successful applicant.

V. SUMMARY

To the best of my knowledge, it is believed both through interpretation of the Code of Federal Regulations and distance separations through computer calculations, the channel assignment corresponding to 232 (94.3 Mhz) would serve the public interest to its principal and surrounding communities. The party has attempted to build the proper argument for rulemaking to change the FM Table of Assignments. As consistent with the Federal Communications Commission, the necessary engineering and applications for this assignment will be required for contour protection of all stations within the vicinity of the proposed station.

All comments pertaining to this petition and their certificates of service should be forwarded to:
